SABIC Invites Progression to Present Technology at Annual Meeting

AL-JUBAIL (December 11, 2006)—Progression, Inc., the leading supplier of NMR analysis instrumentation to the polymer industry, has been invited to present its advanced technologies at the 7th SABIC Technology Exchange meeting in Al-Jubail. The company will present information related to the advances in on-line and laboratory NMR technology, as well as electrostatic and catalyst analysis technologies. This marks the first invitation for Progression at such a prestigious event in the Kingdom of Saudi Arabia.

Scott Marino, President—Progression, Inc. noted, “We are honored to be chosen to share our expertise and experience at the SABIC Technical Exchange meeting. Our advanced Magneflow® on-line NMR products and Correflow® systems are key efficiency drivers for new and existing petrochemical plants in the Kingdom. The new petrochemical expansions that are underway in Saudi Arabia are an exciting opportunity for Progression, Inc. and our customers located in the region.”

About Progression, Inc.

Progression, Inc. (www.progression-systems.com) has an extensive background in the development and implementation of process NMR and holds a broad intellectual property portfolio in its use and application. In addition, the company provides LIBS instrumentation, custom sampling systems, two-phase mass flow monitors and electrostatic charge measurement devices for monitoring unique applications within the chemical process industry. The world’s largest polyolefin manufacturers rely upon Progression products to improve process efficiency and product consistency.

International business accounts for more than 60 percent of privately held Progression’s overall revenues. Strong service and distribution in overseas markets including Europe, Asia, and the Middle East continue to provide exceptional expansion and growth opportunities for Progression.
